

March is Heart Disease Awareness Month

The #1 Symptom of Heart Disease is Death!!!

Undetected cardiovascular disease is the greatest risk facing patients today.

For most patients, the first symptom is a heart attack – and one in four first time heart attacks is FATAL!

Our new HeartSmart IMT^{plus}TM test is your best protection!

- Safe, non-invasive 10 minute test – No radiation
- Accurately measures thickening in the arteries
- Assesses plaque that can cause stroke or heart attack
